

Installation Steps for VOIS

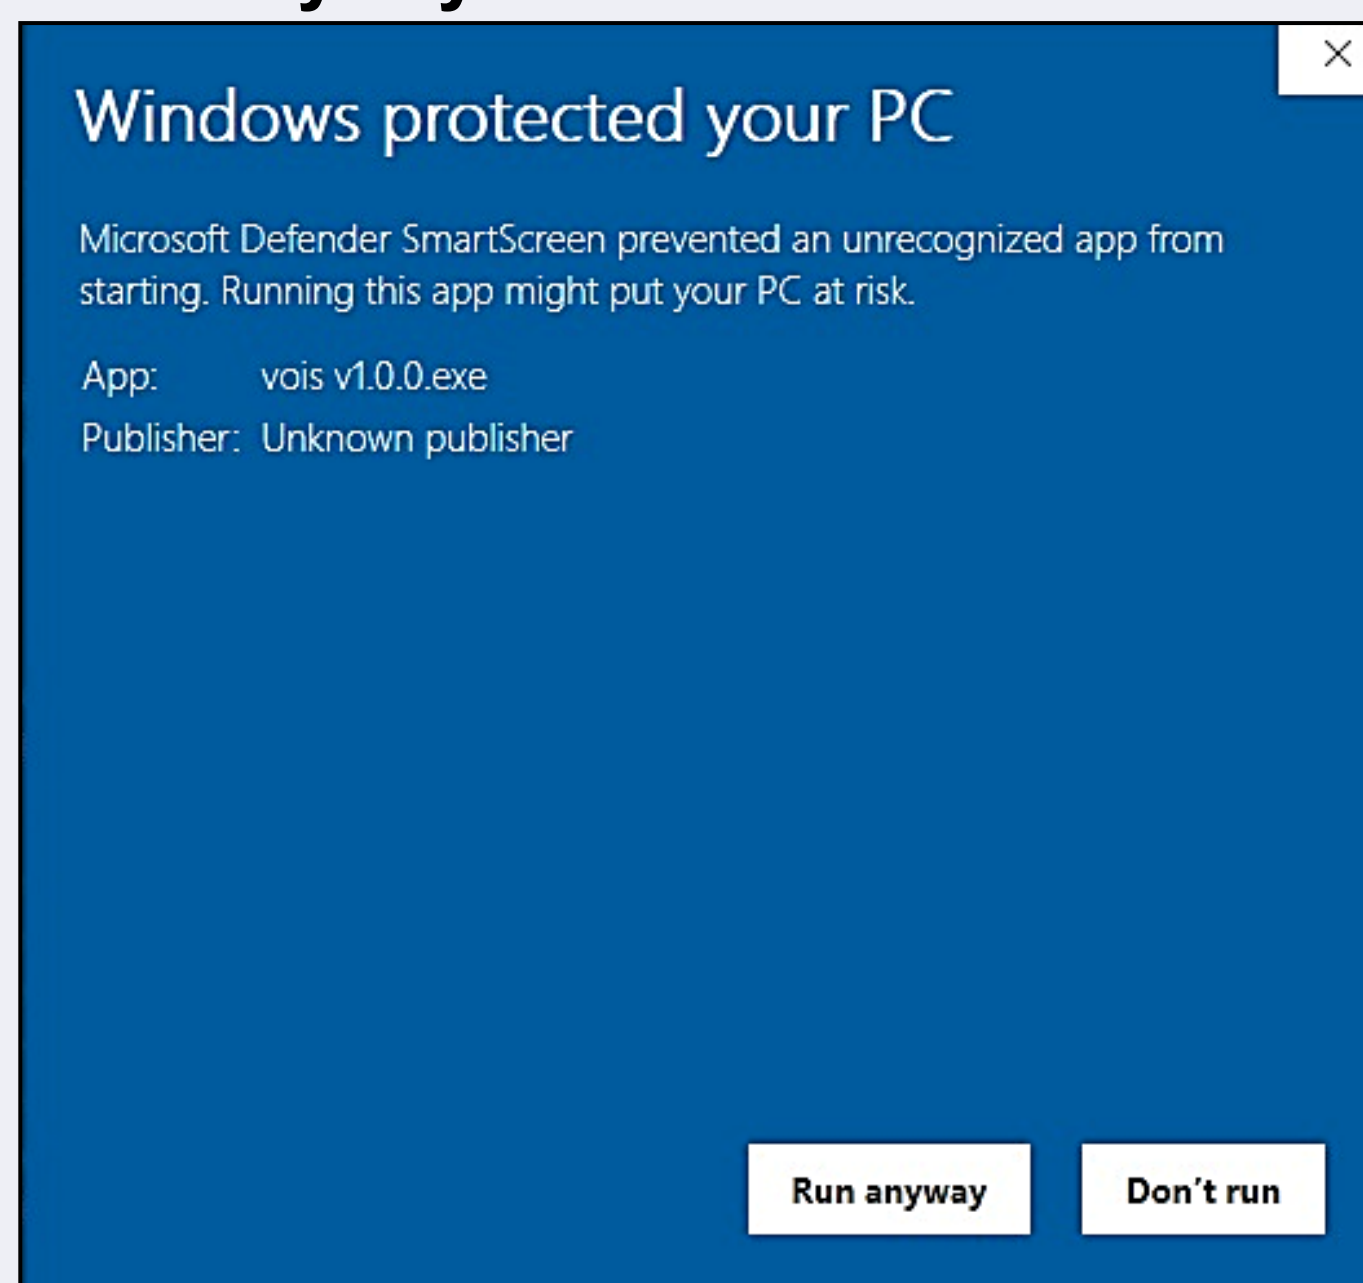

Step 1: Download the Installer

- Click the “**Download for Windows (.exe)**” button on the website.
- The file **vois_setup.exe** will begin downloading.

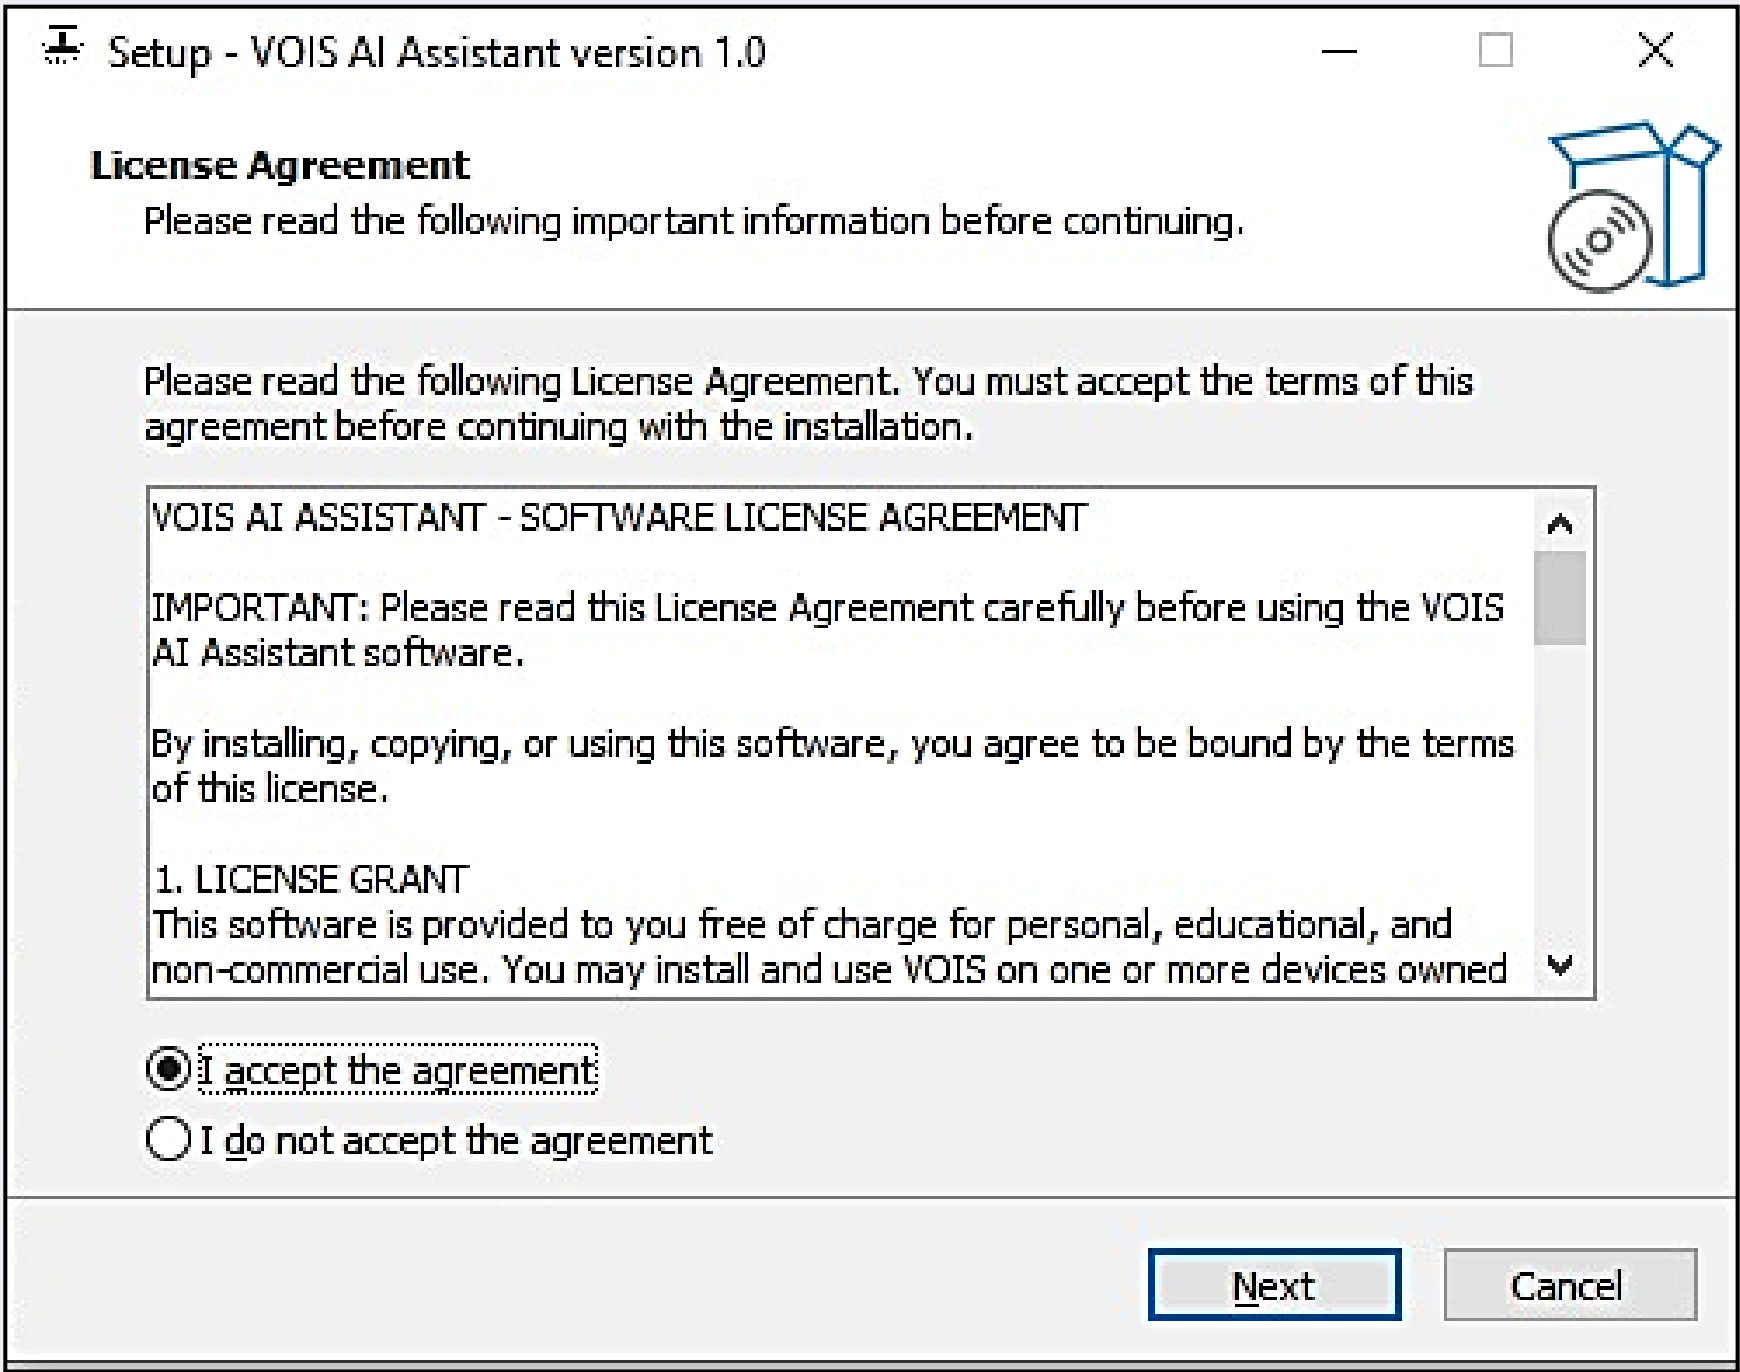

Step 2: Run the installer

- Double-click the VOIS_Installer.exe file.
- If you see a **Windows Defender warning** ("Unknown Publisher"):
 - Click **More info** → **Run anyway**

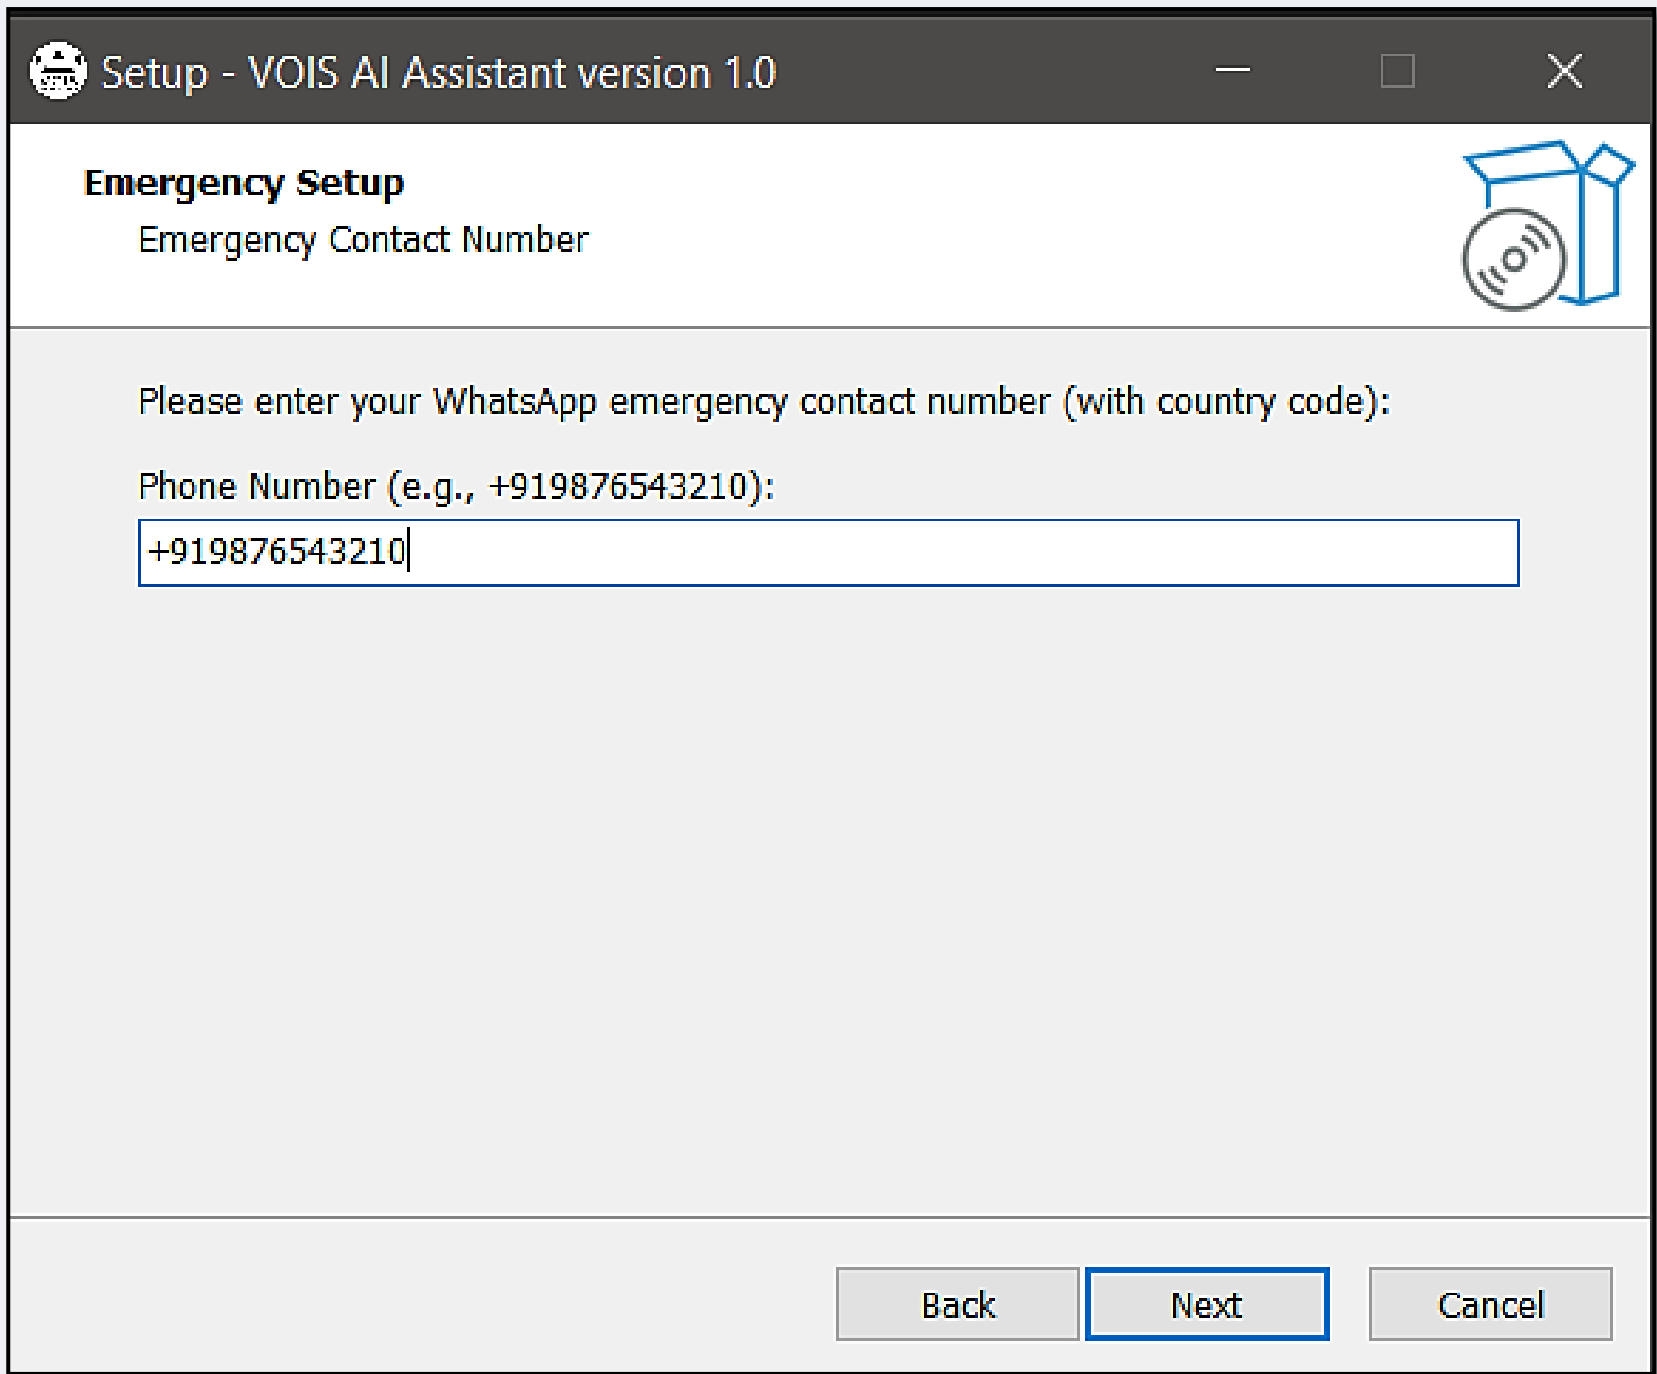

Step 3: Accept license

- Read and accept the license agreement when prompted.

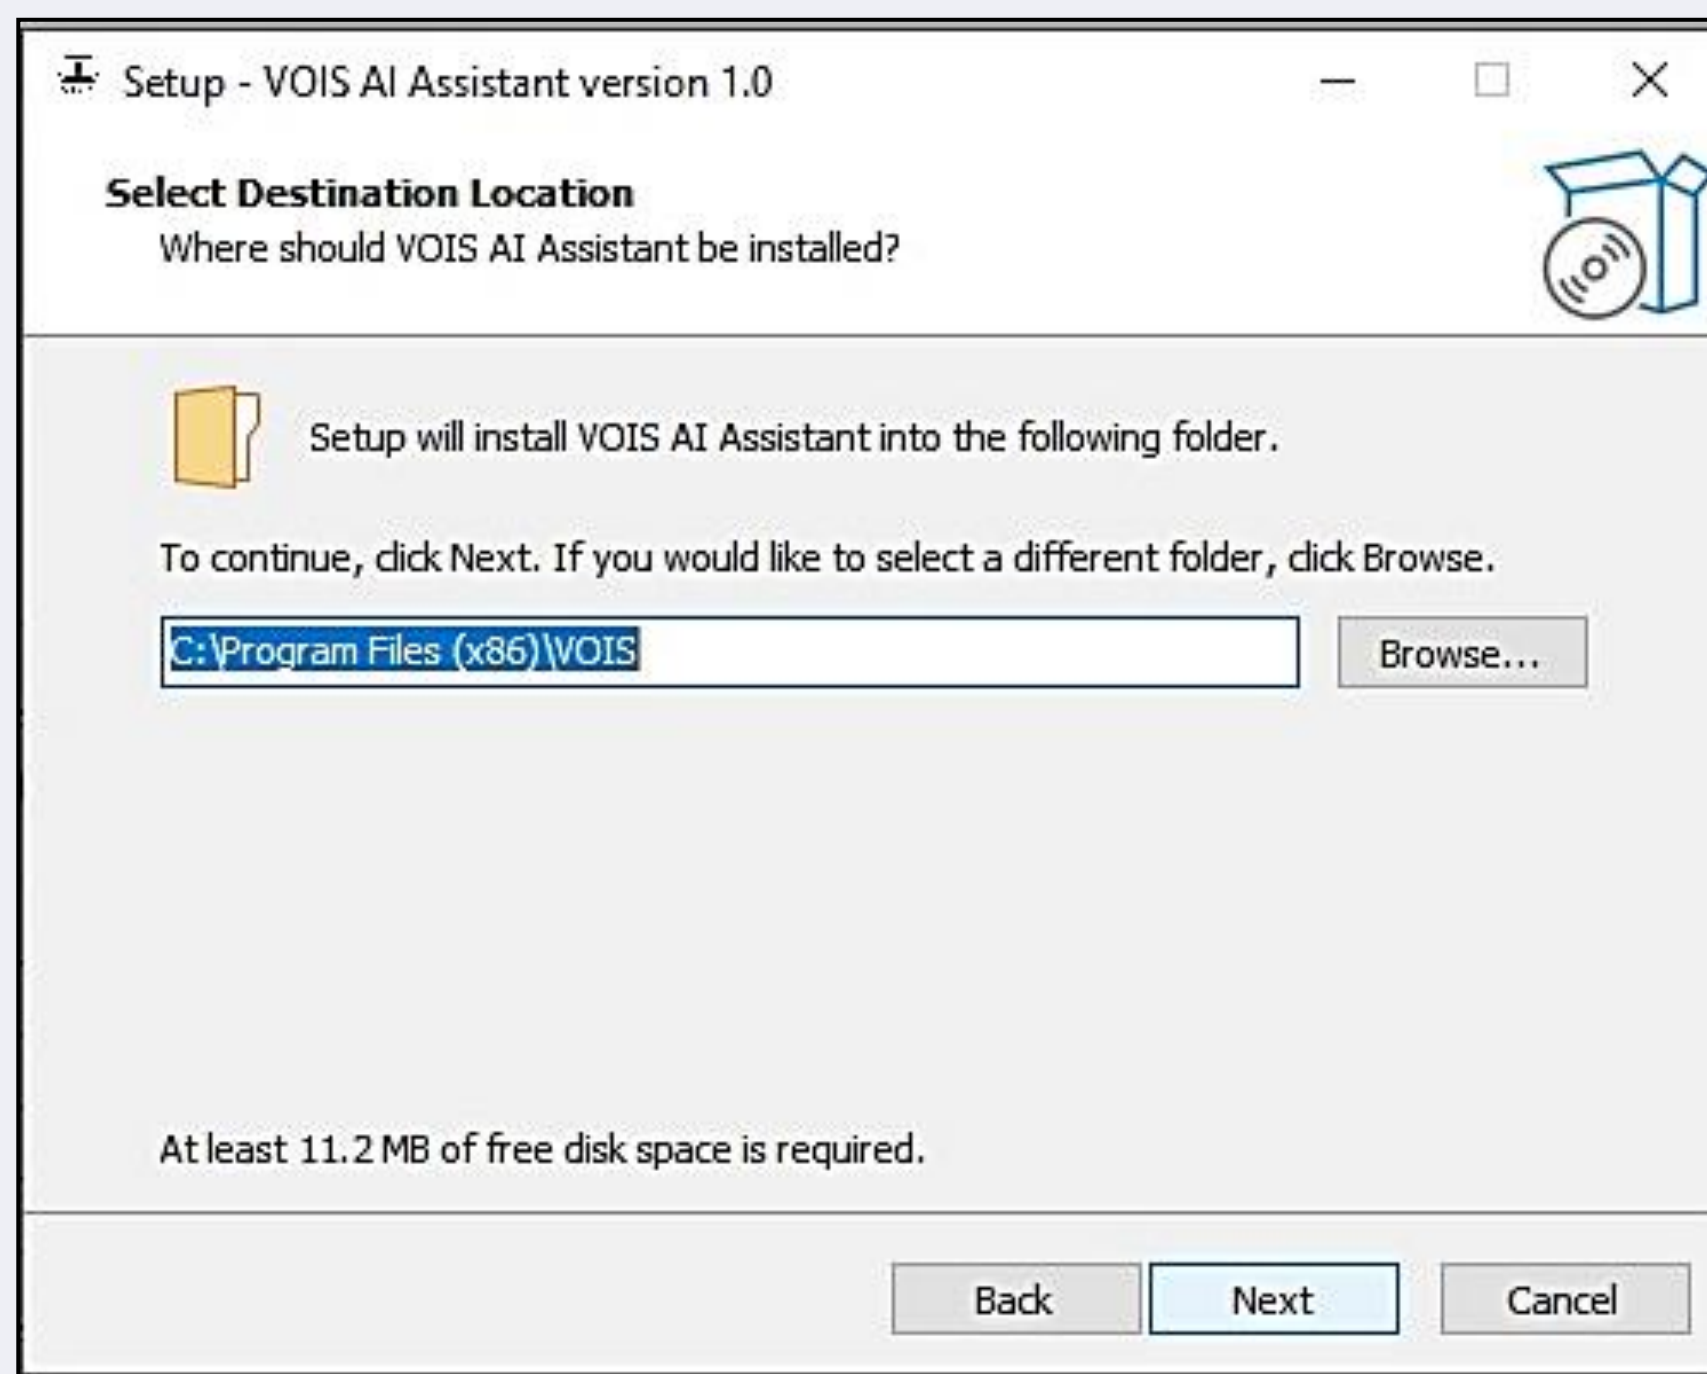

Step 4: Enter Emergency Number

- It will ask to enter the emergency number.
- Enter the number with the country code. (eg. +919874563210)

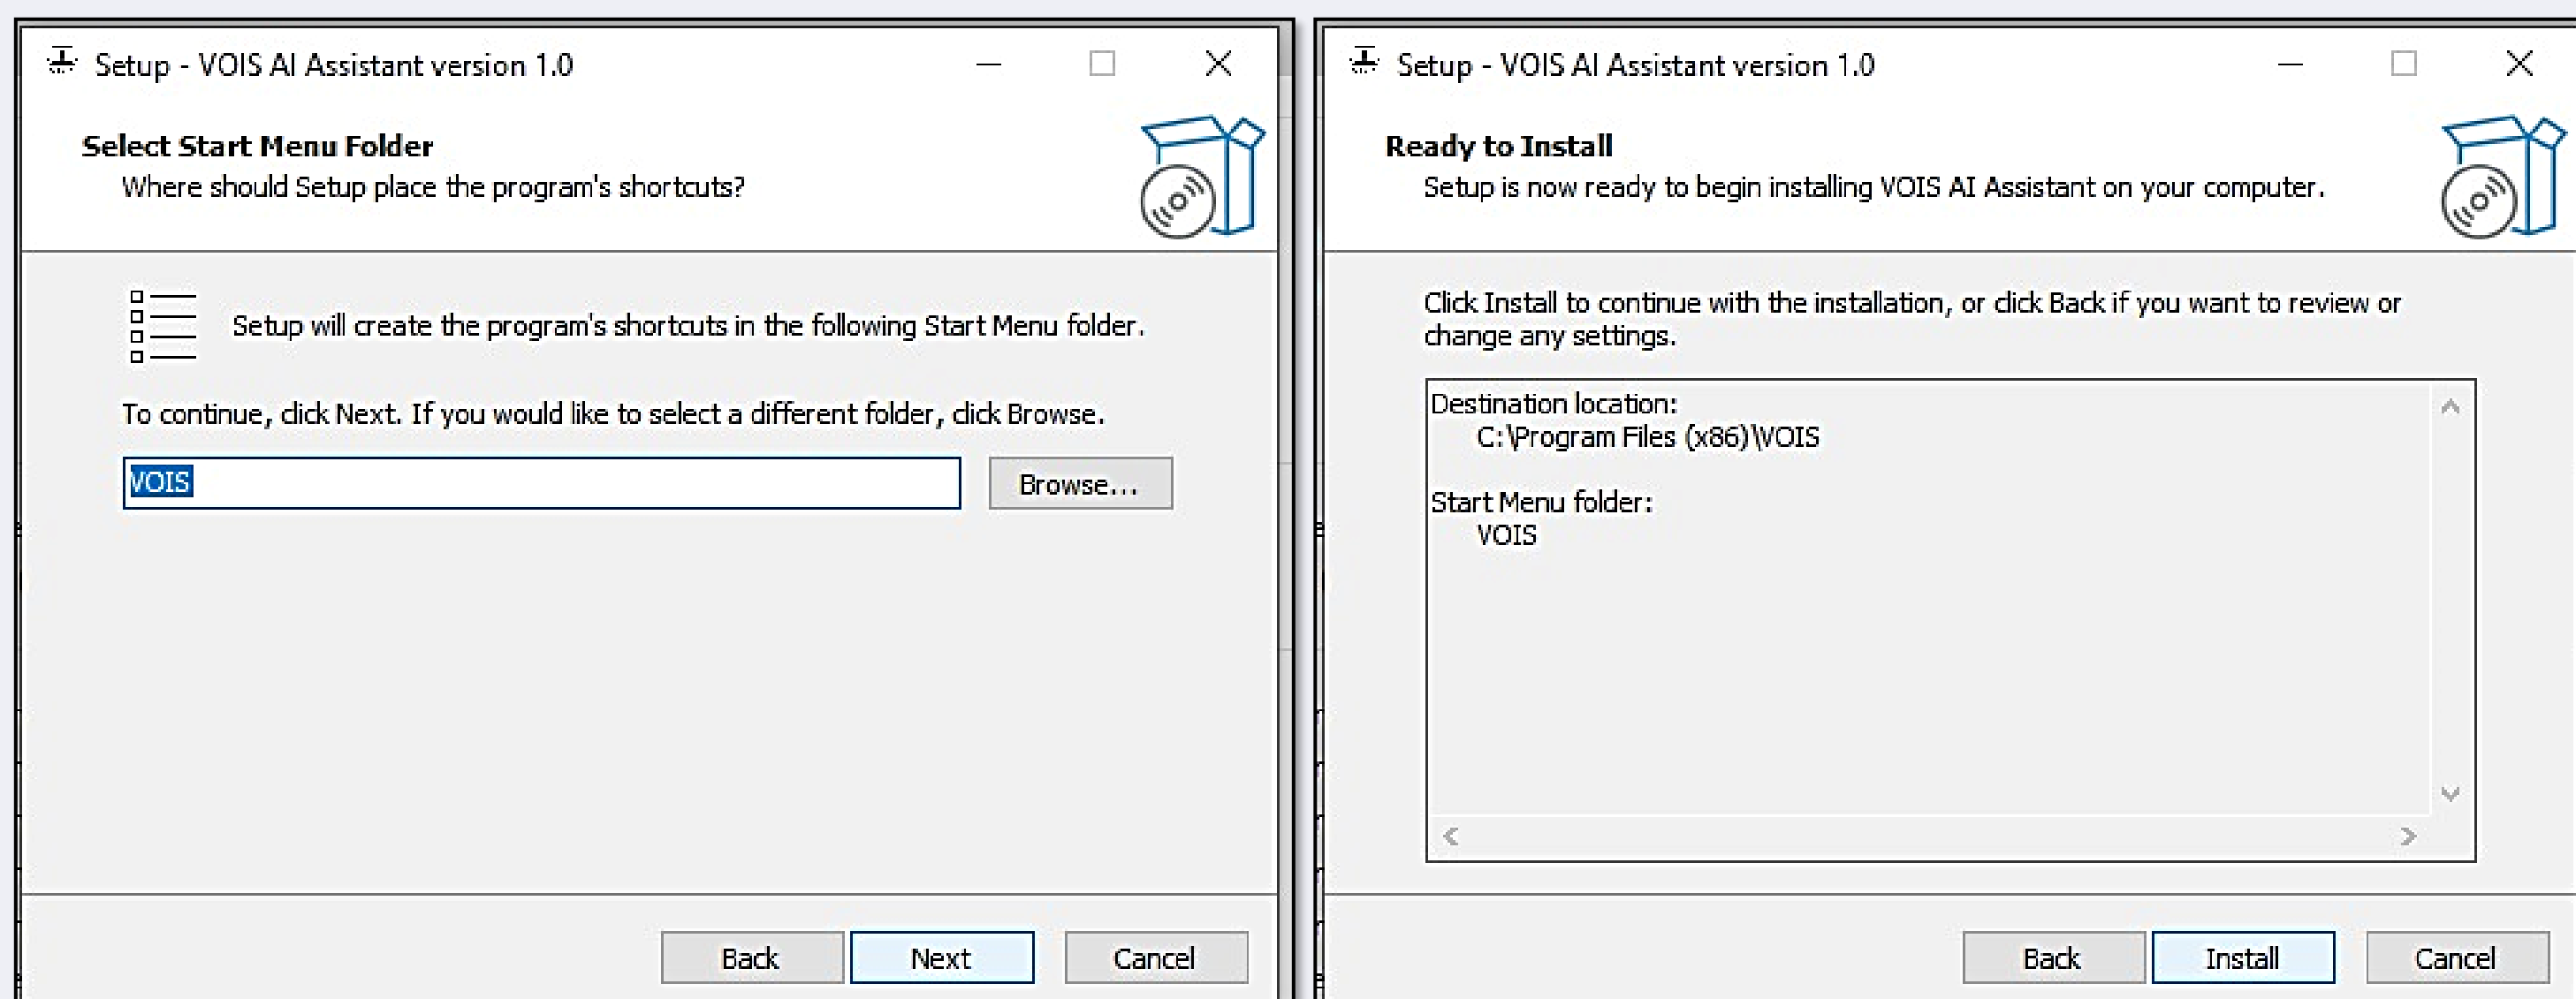

Step 5: Choose Installer Folder

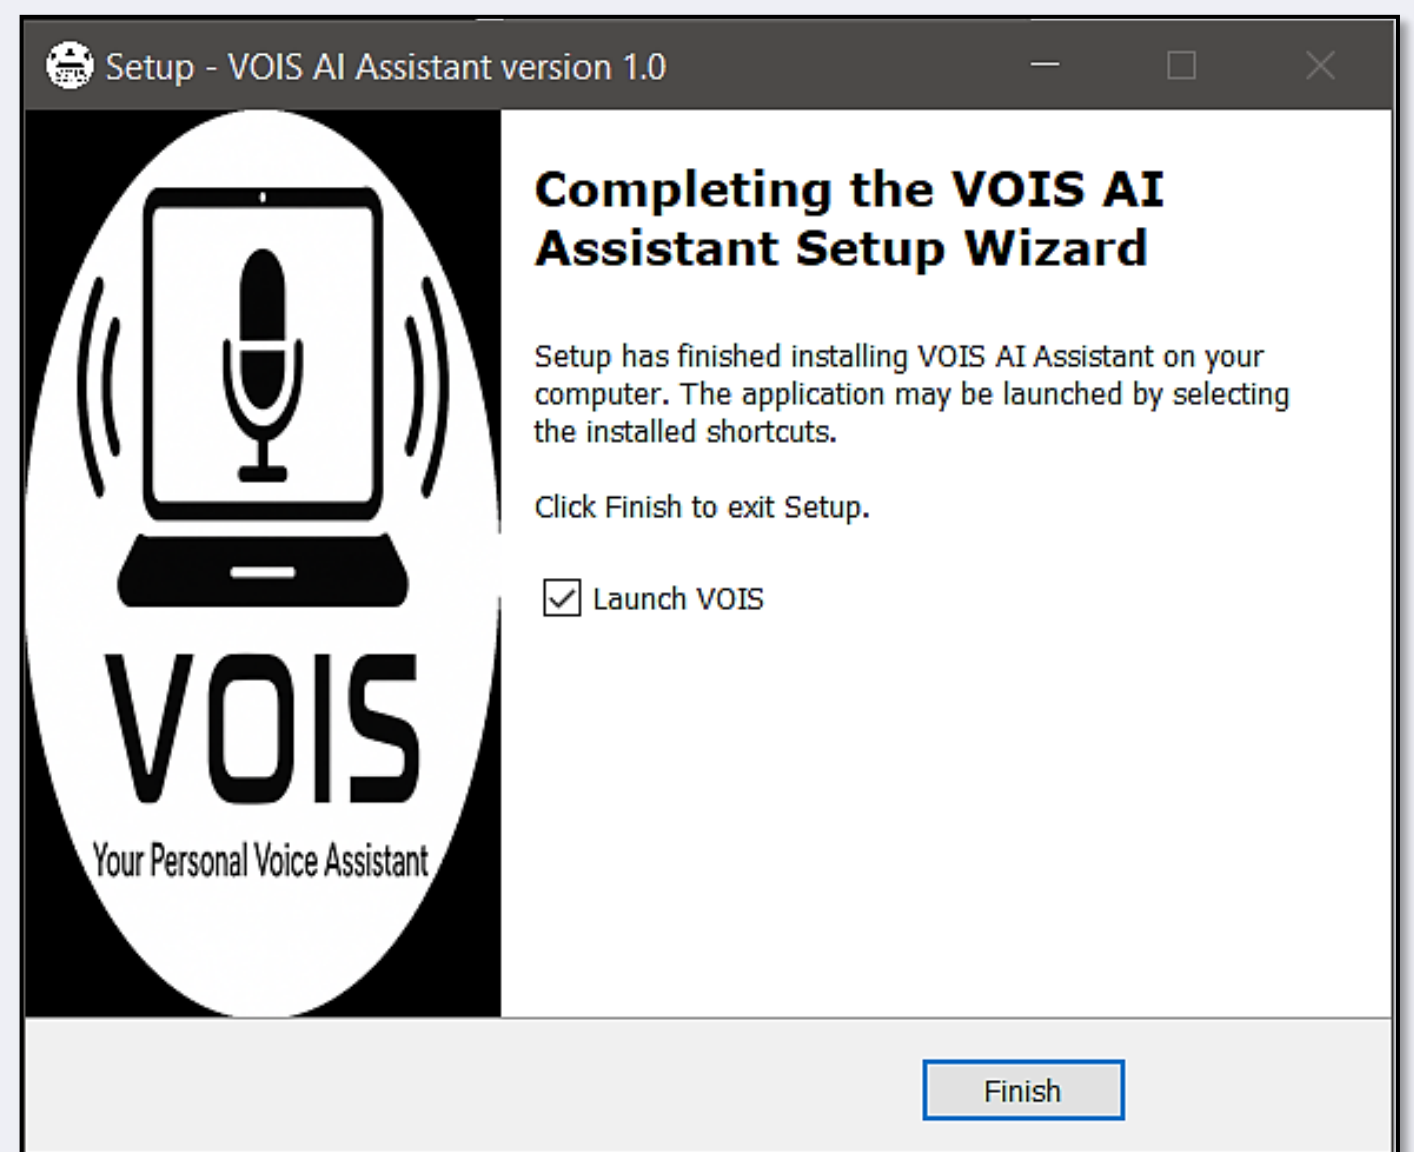

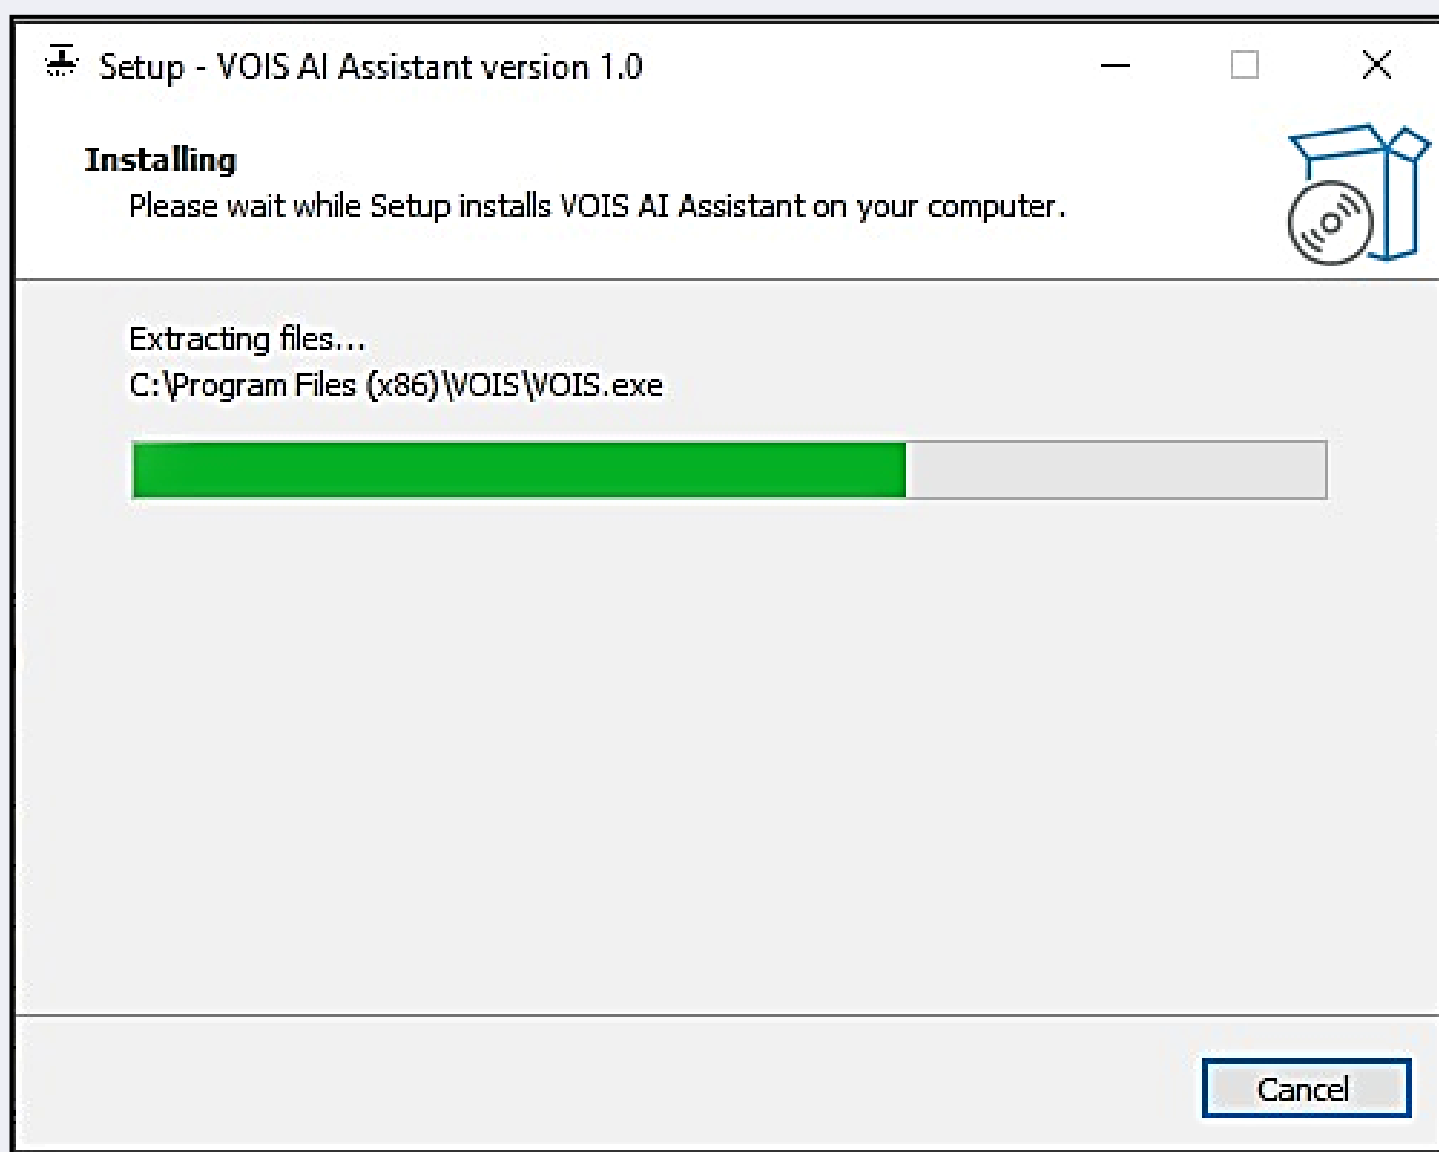

- Default location:
C:\Program Files (x86)\VOIS
- You may change this if needed

Step 6: Installation Complete

- Once installed, VOIS will:
 - ✓ Create a **Start Menu shortcut**
 - ✓ Launch automatically
 - ✓ Register itself to **start on every system boot**
- To verify it is running on system boot:
 - ✓ Go to task manager.
 - ✓ Click on “startup”.
 - ✓ Check whether VOIS is present and enabled.

First Time Setup:

- After installation, VOIS starts automatically.
- You'll hear:
"VOIS is ready. Say 'Hey Vois' to activate me."
- Say "Hey Vois" and follow the instructions to:
- Register your voice
- Authenticate
- Then start using your voice commands.

How to start VOIS Manually :

- Click the **Start Menu**
- Search for **"VOIS AI Assistant"**
- Click to launch

Or go to:

C:\Program Files (x86)\VOIS\VOIS.exe
